About Mern

- MERN stack is a popular technology stack for building dynamic web applications. It consists of four key technologies: MongoDB, Express.js, React, and Node.js. MongoDB is a NoSQL database that stores data in flexible, JSON-like documents. Express.js is a minimalist web application framework for Node.js, providing a robust set of features for building web and mobile applications. React is a JavaScript library for building user interfaces, focusing on component-based development for efficient rendering. Node.js is a JavaScript runtime environment that executes JavaScript code outside of a web browser, allowing server-side scripting for building scalable network applications. MERN stack enables developers to create full-stack applications using JavaScript throughout the entire development process.

WHAT IS SKILLSURGE ?

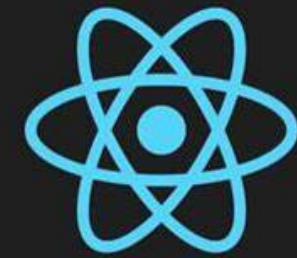

SkillSurge is a professional networking platform. It serves as a digital hub for professionals to connect, share their skills, experiences, and accomplishments. Users can create detailed profiles highlighting their work history, education, skills, and endorsements. SkillSurge facilitates networking by allowing users to connect with colleagues, mentors, and potential employers. . Similar to LinkedIn, SkillSurge aims to empower professionals to build and grow their professional networks and advance their careers.

SKILLSURGE

Users create profiles highlighting their skills, work history, and education. It facilitates job searching, networking, and career development through connections, job postings, industry updates, and professional content sharing
